Diana designs new 45m

■ The prosaically named Project 410 is a new 45m motor yacht designed by Diana Yacht Design, with interior design by Felix Buytendijk and exterior styling by Cor D Rover. Building at Hakvoort, the all-Dutch superyacht project, in steel and aluminium, is due for completion in mid-2006. Two Caterpillar 3508B diesels should give her a cruising speed of 12 knots and a range of 3,800nm. Crucially, she falls below the 500 tonne MCA limit. The yacht will accommodate

up to 14 guests in a traditional-style interior. The owner has a full-width stateroom forward on the main deck with an infra-red sauna and sea-view spa pool, and there are four double guest staterooms situated on the lower deck. *Contact:* Diana Yacht Design, Engelandlaan 232, 2034 NH Haarlem, Holland
